WATER TESTING UPDATE

Dear Parents/Guardians,

On August 19, 2016, RAMM Environmental Services, Inc. conducted additional water testing for the Hillsdale School District.

The water from all our drinking fountains was found with no elevated levels of lead. Elevated levels of lead however, were still found in a pot filler sink at George G. White and at two kitchen sinks, nurse's room sink and Media Center sink at Meadowbrook.

We will continue to provide bottled water for these areas and continue to conduct remediation on the affected areas.

Sincerely,

Jeffrey Feifer, Ed.D.
Interim Superintendent of Schools
